

Application for participation in Cruelty-Free Vendor Directory

Thank you for your interest in networking with others in the animal protection community. By submitting and signing this application, you are indicating that you share our desire to promote a cruelty-free and environmentally sound lifestyle (without the use of pesticides, harsh chemicals, animal testing).

The primary purpose of this directory is to list service providers who do not directly participate in violence towards animals, namely hunting and fishing. However, once you are listed, you will be contacted by individuals with interest in varying areas of animal protection. For example, it is preferred, though not required, that service providers also be vegetarian or leaning towards vegetarianism, and some customers will specifically want this information. Please be prepared to answer questions regarding this and other issues.
